IBRA International Bone Research Association

Program

IBRA SCIENTIFIC EDUCATION

IBRA Satellite Symposium

On the occasion of the 1st International Symposium on Orthognathic Surgery (IAOMS), Vienna, Austria

New Technologies in Maxillofacial Surgery

What is Possible, What is Neccessary?

May 1, 2020
Vienna, Austria

Prof. Dr. Dr. Philipp Jürgens, Munich, Germany
Dr. Giovanni Badiali, Bologna, Italy

IBRA International Bone Research Association

IBRA is a financially independent, internationally oriented non-profit organization, for specialized clinicians and research scientists. IBRA's core activity is the future-oriented advancement of bone-tissue research and management focusing particularly on:

- Bone biology, including osteointegration, bone generation and soft tissue reaction
- Maxillofacial and orthopaedic rehabilitation
- Materials research including hardware development
- Biomechanics
- Tissue engineering
- Surgical procedures & clinical management

IBRA encourages the development of innovative solutions in a friendly, loyal atmosphere. Future-oriented open-mindedness and international acceptance form the basis for first-rate assistance in realizing modern research projects and promoting individual careers. As an international forum reaching across geographic and cultural borders, IBRA offers an up-todate network for the exchange of experience and knowledge in applied bone and tissue research.

History

IBRA was founded in Zurich, Switzerland on September 25, 2004 at the initiative of eighteen forward-looking clinicians. Its primary aims are the exchange of professional knowledge, promotion of new scientific developments, engineering of the musculoskeletal system, coordinated multi-centre research and highly specialized advanced training.

Research Support

IBRA offers financial support for research projects dealing with bone biology and the improvement or development of internal fixation devices for maxillofacial and limbs surgery. With the emphasis on innovation and suitability for practical application, 95% of the research budget goes towards applied research and clinical studies and 5% towards basic research.

Education

IBRA's education area offers clinicians special courses on the application of specific methods of treatment. IBRA's particular concern is to train tomorrow's highly qualified research scientists. IBRA enhances its members' qualifications through a scholarship program.

Friday – May 1, 2020

New Technologies in Maxillofacial Surgery
What is Possible, What is Neccessary?

Speakers: Prof. Dr. Dr. Philipp Jürgens, Munich, Germany
Dr. Giovanni Badiali, Bologna, Italy

Program

	Welcome	*P. Jürgens*
8:00 – 8:30	Evolution of Technologies in Orthognathic Surgery	*P. Jürgens*
8:30 – 9:00	Patient's Specific Treatment in Orthognathic Surgery: from Planning to Cad-Cam Transfer	*G. Badiali*
